A significantly complex industry with high barriers to entry

Barriers to Entry				
Operational Complexity				
<p>Inventory Management</p> <p>Highly complex inventory management to maintain healthy levels without over stocking or running short in a large number of branches</p>	<p>A Variety of SKUs</p> <p>9k unique drug therapies with a variety of handling requirements including fragile containers, liquids, and refrigerated products</p>	<p>High Variability of Demand</p> <p>Short-notice, short-turn deliveries occur frequently and require rapid response from distributors</p>	<p>Labor Intensive Business</p> <p>To become a nationwide distributor, new entrants need to recruit, train, and manage a workforce of over 5,000 personnel</p>	<p>Geographically Dispersed Client Base</p> <p>Over 60k outlets and locations are geographically disbursed across the Country</p>
<p>Working Capital Management</p> <p>Dealing with a large client base, with significant geographic disbursement, emphasizes the complexity of credit control management. Pharmaceutical distributors must aggregate client credit history to be able to minimize bad debts, which requires significant on the ground experience</p>			<p>Time to Build Scalable Operations</p> <p>8+ Years</p> <p>Nationwide distributors require a minimum of 50 sites and over 500 vehicles. New entrants will not be able to manage opening more than 6 branches a year</p>	<p>Low Margin Business</p> <p>1.6%</p> <p>Both developed and emerging market peers have an average net profit margin of 1.6%; reducing the attractiveness of venturing into this market space</p>
<p>Ease of Operations</p> <p>Both manufacturers and pharmacies prefer to deal with few distributors which in return significantly reduces order processing and management costs; large distributors then redistribute to the smaller players</p>	<p>Economies of Scale</p> <p>A human resource based business accustomed with a large workforce leads to significant fixed costs. Additionally, the aggregation of delivery volume reduces delivery costs therefore the total cost per shop does not increase significantly with volume.</p>	<p>Difficulty Contracting with Suppliers</p> <p>350+ suppliers with rigorous contracting requirements, including quality audits, disables new entrants from obtaining credit lines</p>	<p>Investment</p> <p>EGP1.5bn+</p> <p>The business requires a significant amount of infrastructure to be able to cater to geographically dispersed clientele.</p>	<p>A Crowded Market Space</p> <p>A large number of players targeting different segments of the market (in terms of client quality and demand size) with the three largest players controlling 68% of the market</p>
